

The Power of We™

IP Office Mobile Worker Preferred

One number access for employees on the road

Overview

For staff who are often out of the office, but don't require a laptop, IP Office Mobile Worker Preferred (available with IP Office Preferred Edition and Advanced Edition) keeps them readily accessible. Wherever they're working - with clients, between stores/locations, down the hall, in the warehouse, or on the road - Mobile Worker Preferred turns any Android mobile device into an extension of their office phone, with many of the call handling features available in the office.

Staff give out just one phone number - their office number - and calls ring simultaneously on their mobile device, making it easy for customers, colleagues and vendors to reach them wherever they are.

Capabilities

Manage your office from your mobile device - Provide customers and others with just your office phone number and have all calls ring simultaneously on any other phone (mobile, remote office, home), eliminating missed calls when out of the office or away from your desk. Create and manage conference calls right from your mobile device with just a click. Extend presence and instant messaging capabilities to your mobile device, so you can see who's available and instantly contact them through IM.

Roam the office/warehouse - With an Avaya wireless IP phone (purchased separately), staff can roam throughout the building or campus and stay completely accessible, as though at their desk.

Easy access to messages - All messages - voicemail, email, faxes - appear in a single inbox on the PC for fast, efficient message retrieval. Hear and reply to email messages over the phone - no need for a laptop or

smartphone. Use visual voicemail so you can prioritize messages based on importance.

Benefits

- **Enhanced customer service** - Mobile sales and service staff stay connected and responsive to customers regardless of where they are.
- **Increased productivity** - Access to people, messages and information help mobile employees deliver whether in or out of the office.
- **Increased customer knowledge** - All calls that go through IP Office can be tracked and monitored to capture data on customer interactions.
- **Reduced costs** - Calls that are routed through IP Office take advantage of business calling plans, which can significantly reduce overall calling costs.

About Avaya

Avaya is a global provider of business collaboration and communications solutions, providing unified communications, contact centers, data solutions and related services to companies of all sizes around the world. For more information please visit www.avaya.com.
